1 Project Background

The recently launched Deendayal Antyodaya Yojna-National Urban Livelihood Mission (DAY-NULM) aims to promote sustainable development of the large informal and unorganized workforce in the urban areas. DAY-NULM urges special attention on street vendors as an occupational group in the informal sector and requires that interventions be designed for this group so as to improve their quality of life. It is estimated that in several cities street vendors count for about 2 percent of the population. Women constitute a large segment of these street vendors in almost every city. Street vending is not only a source of self-employment to the poor in cities and towns but also a means to provide “affordable” as well as “convenient” services to a majority of the urban population. With this background, the aim of this exercise is to support City Mission Management Unit/DUDA/Nagar Palika Parishad for Survey of Street Vendors, Preparation of City Street Vending Plans and Detail Implementation Plan for Infrastructure improvement projects. The brief description of the tasks to be undertaken in this project is listed as below:

1.1 All activities shall be done in accordance with the provisions of the Street Vendors (Protection of Livelihood & Regulation of Street Vending) Act 2014, UP Scheme for Street Vendors 2016 and UP Street Vendors (Protection of Livelihood and Regulation of Street Vending) Rules 2017 and operational Guidelines of Support to Urban Street Vendors (SUSV) under DAY-NULM issued by MoHUPA, Government of India and directions issued by the State Government from time to time.

2 Survey & Identification of Street Vendors

The first and foremost task is to identify and profile the street vendors. Street vendors in City have to be identified and estimated and numbered at ground level for Biometric process. Vendors need to be classified under three major categories:

Stationary: Those who carry out vending on a regular basis at a specific location, e.g. those occupying space on the pavements or other public places and/or private areas either open/covered (with implicit or explicit consent) of the authorities, and operating on usufruct rights

Peripatetic/wandering: Those who carry out vending on foot and sell their goods and services and include those who carry baskets on their head/slung on their shoulders and those who sell their goods on pushcarts

Mobile: Those who move from place to place vending their goods or services on own vehicles like bicycle or mobile units on wheels, motorized and manually driven, as well as in moving buses, local trains etc.

While categorizing the street vendor based on the above, care may be taken to ensure that the unique characteristic that differentiates a street vendor from other types of vendors, i.e., that they complete their transactions by the end of the day or part of the day thereof, following which they will wrap up their wares and remove them from the spot till the next time of vending.

During the identification period, wide publicity of the event will be taken up in the ULB through banners and mike announcement to ensure that those members not covered by the enumerator during the field canvassing of questionnaires can physically come to the Municipality and get registered.

Once the vendor list is finalized, the following tasks have to be undertaken:

1. Identification of areas where street vendors have been profiled which may be classified as restriction-free, restricted and prohibited vending zones based on set criteria. These criteria may be determined in advance by the ULB in accordance with the broad framework given by the government in the National Street Vending Policy 2009, the Street Vendors' (Protection of Livelihood and Regulation of Street Vending) Act 2014, the Uttar Pradesh Scheme for Street Vendors 2016 and the Uttar Pradesh Street Vendors (Protection of Livelihood and Regulation of Street Vending) Rules, 2017.
2. Identification of existing natural and emerging markets for considering the possibility of developing them into regular markets and vending zones in a PPP mode for the vendors.
3. Identification of vending zones operating on time-sharing basis as well as weekend market zones
4. Work out the holding capacity of the vending zones identified
5. Work out procedure of allotment of spaces for vendors' markets for regular as well as vending on time-sharing basis including the period of validity of the allotment of spaces for the vendors.
6. The survey shall be conducted zone, ward or market wise in the form prescribed in the rules and all the data shall be stored digitally.

3 GIS Base Mapping and Surveys

GIS mapping has to be undertaken at two levels namely City level mapping and vendor level mapping.

3.1 City Level Mapping

The geo-referenced base map of the city shall serve as a foundation for preparing Street Vending Plan where all other thematic maps may be overlaid for spatial analysis. Thus, it shall aid Planners in preparing Vendor Plan. City level GIS mapping has to be done with the help of latest satellite imagery. For that purpose, Procurement of Cartosat II / Quick Bird / World View satellite image from the National Remote Sensing Agency (NRSC) or any other authorized Agency for the project area has to be purchased by the Consultant and it shall be reimbursed by the client.

The following layers have to be created in city level mapping:

1. City/Municipal and ward boundaries
2. Vendors/vending zones will be captured using GPS equipment
3. All water bodies, viz., Stream, creeks, tanks, etc
4. Roads with classification as Arterial /Sub arterial /Slum roads etc
5. Railroads, Other landmarks such as temples, mosques, church etc.

3.2 Vendor Location Level Mapping

The delineation of vendor zonal boundaries has to be done with the full involvement of the vendors and its association, if any. The delineation of boundary will be done in GIS with the help of GPS co-ordinates captured for all the vendors.

This will be based on the division of the zones for restriction-free vending, as well as for vending on restricted basis and areas where vending is prohibited. This activity will take into account existing norms, if any, in the City level, the authenticity of such a division. Existing norms pertaining to the zoning (green, amber and red zoning) will be studied and relevant norms for the city will be worked out.

3.3 Capturing Photo and biometric identity of Street vendors

The following steps have to be followed for capturing photo and bio-metric identity of the vendors:

1. Developing and implementation of user interface to capture photo and biometric identity data
2. Installation or deployment of user interface software in laptops /computers to capture Photo and biometric identity data
3. Store photo and biometric data into database in appropriate format
4. Check and validate stored photo and biometric data.

3.4 Preparing Registration certificates & ID cards for Street vendors

Each vendor surveyed has to be given Registration Certificates & photo ID cards and the steps followed are listed as below:

1. Format preparation for Registration Certificates & ID cards to print
2. Verify the correctness of data
3. Print Street Vendor Registration Certificates & Photo ID cards.

Such identity card and the certificates of vending shall be given to the street vendors after approval and in the manner prescribed by the Competent Authority (Town vending Committee) and ULB/CMMU/DUDA/SULM-SUDA, UP.

3.5 Preparing MIS Software

A data base of all street vendors will be maintained by the ULB. So, Consultant will have to prepare software which helps ULB to maintain all records of vendors in future also. As vendors are mobile, the software should be able to track (based on either present/permanent address or any other criteria) whether the vendor has already been covered and issued an Identity Card. For such purpose, software has to be developed for monitoring after implementation of the street vending Plan to monitor the entire allotment, registration and the whole above process.

3.6 Vendor Census Survey

Consultant has to conduct of survey for identification and enlisting of street vendor and it has to be carried out with trained enumerators in a digital. The survey should preferably be conducted on a whole city basis. Alternatively, the Consultant may also choose to complete the survey in a phased manner, covering one area (ward/ zone/ specified part of city) at a time. In this case, the area identified should be sufficiently large to accommodate mobility of vendors within the area. The survey must cover all street vendors in the area being surveyed. Consultant has to developed methodology for conducting the survey. At a minimum, the survey must include Name, Name of parents, Permanent Address, Present Address, Identity proof (if any), Telephone number (if any), Place of vending, Type of vending activity, Time/Duration of engagement as a vendor, Details of family members, if identified as beneficiary/poor for any of the government schemes like Food Security Act, TPDS, SJSRY, etc (using survey format prescribed in the schemes or rules.

During the survey, the original documents pertaining to present/permanent address proof, especially in the case of migratory population may also be verified so that the Identity Cards issued to the surveyed street vendors can act as sufficient documentation for opening of their bank accounts, getting loans from banks, accessing social security benefits, etc.

Every street vendor to whom the certificate of vending has been issued shall be given an identity card in the prescribed format. A data base of all registered street vendors will be maintained by

the Town vending committee. Since the vendors are mobile, the software should be able to track (based on either present/permanent address or any other criteria) whether the vendor has already been covered and issued an Identity Card.

3.7 Preparing de-duplication software

In order to avoid duplication, consultants have to develop de-duplication software and the steps have to be followed are as listed below:

1. Developing and Implementation of de-duplication software to verify captured biometric data.
2. Generate a report for duplicated (bulk) biometric data
3. Allow duplication verification process while capturing biometric data at the later stage.

3.8 Linkages with Aadhar no.

All details recording street vendors surveyed shall be linked with their Aadhar nos positively. If any vendor is not having his Aadhar number. The consultant shall facilitate in enrolment of Aadhar.

4. Preparation of City Street Vending Plan

- (1) The consultant has to prepare city Street vending plan as per the provisions of the Street Vendors (Protection of livelihood and Regulation of Street Vending) Act, 2014 the Uttar Pradesh (Protection of livelihood and Regulation of Street Vending) Rules, 2017 and the Uttar Pradesh Scheme for Street Vendors 2016.
- (2) The plan shall be prepared to promote the vocation of street vendors covering the matters contained in the First Schedule of the Act 2014.
- (3) The Street Vending Plan will also take into account the natural markets where sellers and buyers naturally congregate for the sale and purchase of products and services. The Plan will be developed after consultations with Street Vendor's representatives and other relevant stakeholders.
- (4) While preparing the Street Vending Plan, the consultant shall coordinate with the city police, traffic police, planning authority and other local agencies should also devise and promote vendor friendly policies, solutions and strategies to accommodate and facilitate street vending in a manner that is conducive to street vendors and the public at large. This may include policies for traffic management and regulation on market days or at certain times of the day, arrangements for lighting, water, sanitation and waste disposal in street vendor market areas. The ULB may coordinate with planning authorities to develop pro-vending norms and stipulation of vending spaces in new or refurbished roads, markets, office and residential complexes and other public spaces and public infrastructure. This will ensure greater acceptability of Street Vending Plans among the stakeholders.
- (5) The consultant should make every effort to minimize disruption to existing markets while developing the city street vending plan. Accordingly, the plan may be developed in such a manner that no relocation or eviction of street vendors takes place. Re-location of street vendors, if required, must be based on consultation with the affected vendors. Based on the survey findings, the City Street Vending plan may also include a digitized or non-digitized map of vending activities, vending trades and existing markets at ward or zone level.

- (6) **Management Information System** - Street vending Plan has to suggest methods of Monitoring system using MIS software. For such purpose, software has to be developed for monitoring after implementation of the street vending Plan to monitor the entire allotment, registration and the whole above process. This MIS software has to be developed in consultation with the Municipal Corporation.
- (7) The plan for street vending shall be put up to the ULB through CMMU for approval of the State Government.

5. Preparing Detailed Implementation Plan (DIP)

The Consultant has to prepare a Detailed Implementation Plan (DIP) for infrastructure improvement projects which may include improved civic facilities such as paving, water supply, toilets, waste disposal facility, lighting, common storage space, and specialized carts for specific types of trades, temporary sheds and/or parking facilities. The infrastructure requirements for vendors markets will be assessed based on consultations with street vendors and their associations, local agencies and other stakeholders and will be facilitated by the ULB.

The DIP for infrastructure improvement must be prepared only after the street vendor survey and the master plan for the area where the project is located, has been completed. While preparing the DIP, provision for providing specialized carts to the street vendors for specific types of trades such as food vending etc. may be included with a view to improve the hygiene and optimal utilization of space. These carts may be funded through individual loans covered under the SEP component of DAY-NULM

5.1 DIP should contain:

- (i) Project rationale, details of beneficiaries and stakeholders, how it will contribute to improved street vending in the surrounding area, and how it fits within the overall City Street Vending Plan
- (ii) Land ownership details
- (iii) Relocation plan, if any must be supported by a letter of consent from the affected street vendors and/or their association
- (iv) Specific infrastructure improvement project details with costs, including operations and maintenance plan
- (v) Detailed and complete list of beneficiaries who will benefit from the project
- (vi) Safety concerns, if any, relating to fire hazard or other hazards.

DIP for creation of food streets farmers' markets night market and other such specialized/theme based markets may also be developed.

DIP must be submitted to the State Level Project Sanctioning Committee of SULM, UP after approval of City Street Vending Plan (CSVP).
