This lot of DPR contains total number of 72 ULBs spreading across the state. These ULBs have been segregated in two groups as per their location falling under the **earth quake prone Zone III and Zone IV.**

The cost of the construction may be reduced of those ULBs which falls under zone III. The safety measures can be taken in zone IV and black cotton soil considering the nature of the soil falling under respective seismic zones. As explained in PMAY HFA guidelines (Chapter 9), that different layout designs will be prepared to construct the building with innovative technologies and materials, green buildings using natural resources.

The table below shows the breakup of the DUs according to the seismic zone.
